

Statement of Account

INTERNAL DRAFT — DTRX /

transaction_headers reconstruction. Not a DEBENQ enquiry. Balance due is **ASSERTED** (sum of ingested header amounts), not **PROVEN** from an ERP CURRENT BALANCE header. Do not send to the customer until a DEBENQ TXT lands and this is re-run.

BELLA ENERGY SERVICES300 (PTY) LTD T/A GAZ EXPRESS

50 WINSTON ROAD
PIETERMARITZBURG
3201

To: JAYZ GRILL

Account: JAY000

Trading as: Jays Grill

Statement date: 08 September 2026

Source: DTRX headers (9 rows) + item lines (10)

Account summary

	Amount (R)	Epistemic
Opening balance (1 September 2026)	19,897.64	ASSERTED — reconstructed running total before 2026-09-01
Movement this month (invoices, credit notes)	-6,037.50	ASSERTED
JAY000 reconstructed header total	13,860.14	ASSERTED — Σ DTRX header (excl+tax)
Balance due	13,860.14	ASSERTED — not DEBENQ CURRENT BALANCE

Aged balance — open invoices

Age is calculated from **invoice date** to 31 August 2026.

Current	30 day	60 day	90 day	120+ day	Subtotal
13,860.14	0.00	0.00	0.00	0.00	13,860.14

Open invoices

Reconstructed from DTRX header ref_no tagging (Crđ Note → invoice). Screening hypothesis — see tag gate below.

Inv	Inv date	DN / ref	Due (R)
52688	18 Aug 2026	DN#24274	12,967.57
52793	25 Aug 2026	DN#23979	892.57

Tag coverage

Field	Value
Gate	ALLOWED · PATTERN_ONLY
Meaning	No contradiction found: the list ties within the ERP balance and no open invoice is marooned behind a payment gap. This is absence of evidence against the list, not proof it is right — ERP payment tagging is not authoritative (business_rules.md §3). Read it together with evidence.basis: REMITTANCE_BACKED means the customer's own records were checked too; PATTERN_ONLY means they were not, because none exist, and the claim rests on the payment pattern and business rules instead.
Invariant $\Sigma(\text{open})$ vs reconstructed total	PASS (open 13,860.14 / header 13,860.14)

No remittance advices on this account — remittance-contradiction check did not run. **ALLOWED** here is absence of contradiction against the reconstructed total, not verification.

DTRX item tagging exceptions

Header ref_no and item stock group disagree. Totals still tie; the **which-invoice** split may be wrong. Operator review before customer send.

CN	Tagged invoice	CN group	Invoice group	CN amount (R)
15594	52793	CYL	LPG	-6,037.50

Item sub-ledgers (DTRX lines)

Lane	Net (R)	Epistemic
LPG gas	13,860.14	ASSERTED — Σ vw/item line_total
CYL deposits	0.00	ASSERTED — Σ vw/item line_total
1A + 1B	13,860.14	Must equal reconstructed header total

Mixed header documents (LPG + CYL on one invoice):

Doc	LPG (R)	CYL (R)	Header total (R)
52688	6,930.07	6,037.50	12,967.57

Provenance

Field	Value
Source kind	dtrx_headers
Headers	analysis/debtors/JAY000/data/dtrx_headers.csv
Items	analysis/debtors/JAY000/data/dtrx_items.csv
As-at	2026-09-08
Ageing as-at	2026-08-31
Authority	DTRX headers + items only — DEBENQ TXT absent

Tripwire: a DEBENQ / statement TXT for this account reopens the balance. If its CURRENT BALANCE $\neq$ the reconstructed total, this draft is superseded and must not be sent.
