

CUSTOMER:	Family Gas (FAM000 / FAM002)	OPENING BAL B/F:	R61,626.77 (Balance B/F)
PERIOD:	March 2026 → Latest	CLOSING BALANCE:	R60,271.88 (Reconciled Total)

⚠ Audit Disclosure & Executive Summary

During the reconciliation of FAM000 + FAM002, we uncovered critical ERP reporting bugs that severely distort the customer's ledger balance in the database header table (`transaction_headers`).

🔍 Key Findings:

1. Bug A: Credit Note Double-Taxation in Database Headers

- **Problem:** The physical CSV statement is correct, but the ERP database header table incorrectly records the tax-inclusive total (e.g. -R7,705.00) inside the `amount_excl` field for Credit Notes. Any database query summing `amount_excl` + `tax_amount` double-taxes the transaction, resulting in an artificial -R8,710.00 total.
- **Solution:** Our reconciliation logic sums the raw line items (`line_total` from `vw_clean_transactions`) directly, safely bypassing this header-level bug.

2. Bug B: Re-Used Document Numbers & Truncated History

- **Problem:** The ERP re-uses document numbers across different financial years. Because the statement was generated for the "CURRENT" year, historical line items were hidden in the Balance B/F, creating an artificially inflated starting balance and giving the false illusion that the ERP was randomly dropping lines from mixed documents.

3. True Reconciled Balance:

- This Stacked Statement calculates the **True Balance directly from raw database line items** (`vw_clean_transactions`), safely bypassing the ERP statement generator's bugs.

Part 1: LPG Gas Statement

Tracks all gas invoiced and all payments received since 1 March 2026. The Balance B/F is the true reconciled financial balance as of 28 February 2026.
