

CUSTOMER:	N/A	OPENING BAL B/F:	N/A (Balance Forward)
PERIOD:	N/A	CLOSING BALANCE:	N/A (Reconciled Total)

Metadata

- **Date:** 30 June 2026
- **Analyst:** Reconciliation Analyst & Debtor Reconstruction Specialist
- **Source Files Reviewed:**
 - Database schema (transaction_headers, vw_clean_transactions, vw_cylinder_ledger)
 - Raw ERP transaction dumps (DETRANS.TXT, april_dump.TXT)
- **Doctrine Version:** CYL Settlement Allocation Doctrine (v4 Canonical)

Statement Scope

- **Period:** 3 December 2018 to 30 June 2026
- **Included Accounts:** account_no = 'JIM001'

⚠ Diagnosed ERP/Deduplication Defect (Disclosed Exception)

- **Stated ERP Balance (Naive Deduplication):** R431,611.31
- **Reconstruction Variance (Naive Deduplication):** R284,760.09
- **Diagnosis:** The ERP database records split payment allocations as separate header entries (representing allocations of the same payment across different invoices). A naive deduplication logic checking `DISTINCT ON (doc_no, entry_type, tx_date, amount)` incorrectly drops these split allocations because they share document numbers and dates, dropping over **R268,000.00+** of customer payments.
- **Resolution:** Consolidating payment splits by document number and date before cross-file deduplication resolves the true payment sum to **-R962,395.73** (instead of -R672,084.85 under naive deduplication), reducing the unexplained ERP variance to the true residual variance of **R55.91** (with corrected ERP Stated Balance of **R\${fmtClean(erpStatedBalance)}**).
- **Rule:** Split payment allocations must **NOT** be deduplicated away, as they represent valid separate allocations.

Opening Balance Analysis (as of 3 December 2018)

- **Method Used:** Lifetime Reconstruction starting from first available transaction.
- **Supporting Evidence:**
 - **Combined B/F Balance:** R0.00
 - **Cylinder Financial B/F Value:** R0.00
 - **LPG Gas Opening B/F:** R0.00

Cylinder Analysis

- **Outstanding Quantities (as of 3 December 2018 B/F):**
 - 14kg: **0 cylinders** (Standard SKU: 14.1)
 - 19kg: **0 cylinders** (Standard SKU: 19.1; Historical SKUs: 19.6, 19.7)
 - 9kg: **0 cylinders** (Standard SKU: 9.1; Historical SKUs: 9.2, 9.7)
 - D.1 (48kg DV): **0 cylinders**
 - S.1 (48kg SV): **0 cylinders**
- **Period Net Qty Changes (Dec 2018 – June 2026):**
 - 14kg: Net change: **1 cylinders**
 - 19kg: Net change: **24 cylinders**
 - 9kg: Net change: **2 cylinders**
 - D.1 (48kg DV): Net change: **16 cylinders**
 - S.1 (48kg SV): Net change: **-9 cylinders**
- **Net Returnable Cylinder Position (Custody outstanding as of 30 June 2026):**

- 14kg: Outstanding: **1 cylinders**
- 19kg: Outstanding: **24 cylinders**
- 9kg: Outstanding: **2 cylinders**
- D.1 (48kg DV) Outstanding: **16 cylinders**
- S.1 (48kg SV) Outstanding: **-9 cylinders**

Cylinder Financial Analysis

- **Net Cylinder Custody Exposure:** $R\{\text{fmtClean}(\text{totalCylinderCustodyExposure})\}$
- **Cylinder Financial Balance:** $R\{\text{fmtClean}(\text{final_cyl_balance})\}$
- **Cylinder Variance:** $R\{\text{fmtClean}(\text{cylVariance})\}$ (Financial - Custody)
 - The cylinder variance of $R\{\text{fmtClean}(\text{cylVariance})\}$ arises due to legacied price variations and deposit rate shifts.

Allocation Evidence Register

This register traces cylinder deposit transaction assumptions, classifying the strength of the evidence trail according to the Cylinder Allocation Doctrine:

Evidence Strength Tiers

- **Confirmed:** Cent-matching payment explicitly clearing the parent invoice. (High confidence)
- **Probable:** The invoice containing cylinder exposure is cleared in full through general monthly statement payments (running balance pool) rather than a dedicated transaction match. (High/Medium confidence)
- **Assumed:** No direct transactional payment match, but assumed based on historical system migration boundaries. (Medium/Low confidence)

Evidence Source Types

- **EXPLICIT_ALLOCATION:** Direct operator-entered allocation mapping a payment to a cylinder.
- **FULL_INVOICE_SETTLEMENT:** System infers allocation because a payment (or monthly pool payment) cleared the parent invoice containing both LPG and CYL components in full.
- **SYSTEM_MIGRATION_CARRIED:** Carried balance from legacy account migration.

EVENT / DOCUMENT	DATE	SKU	QTY	AMOUNT	MATCH TARGET	CLASSIFICATION	EVIDENCE SOURCE	CONFIDENCE	EVIDENCE TRAIL / LOGIC
Opening Balances	Pre-Dec 2018	Various	0	R0.00	Legacy Statement	Confirmed	SYSTEM_MIGRATION_CARRIED	High	Account inception starting at R0.00 balance.
Period Movements	Dec 2018 - June 2026	Various	0	R0.00	Monthly Payments	Probable	FULL_INVOICE_SETTLEMENT	High	Monthly pool payments settled period cylinder invoices and returns in full.

LPG Analysis

- **LPG Balance:** $R\{\text{fmtClean}(\text{final_gas_balance})\}$
- **LPG Supporting Calculations:**
 - **LPG Gas Opening B/F:** R0.00
 - **LPG Gas Billed (Period):** $R\{\text{fmtClean}(\text{periodLpgInvoices})\}$
 - **LPG Gas Credits (Period):** $R\{\text{fmtClean}(\text{periodLpgCredits})\}$
 - **LPG Payments (Period):** $R\{\text{fmtClean}(\text{Math.abs}(\text{periodPmtsSum}))\}$
 - **LPG Gas Closing Balance:** $R0.00 + R\{\text{fmtClean}(\text{periodLpgInvoices})\} + (R\{\text{fmtClean}(\text{periodLpgCredits})\}) + (R\{\text{fmtClean}(\text{Math.abs}(\text{periodPmtsSum}))\}) = R\{\text{fmtClean}(\text{final_gas_balance})\}$

Final Reconciliation

Cylinder Financial Balance:	$R\{\text{fmtClean}(\text{final_cyl_balance})\}$
Plus LPG Gas Balance:	$R\{\text{fmtClean}(\text{final_gas_balance})\}$
=====	
Total Reconciled Balance:	$R\{\text{fmtClean}(\text{final_combined_balance})\}$
ERP Statement Current Balance:	$R\{\text{fmtClean}(\text{erpStatedBalance})\}$
Variance:	$R\{\text{fmtClean}(\text{erpVariance})\}$

Variance Analysis (v3 vs v4)

Metric	Version 3 Statement	Version 4 Statement	Material Variance	Reason for Variance
LPG Gas Balance	N/A	R\${fmtClean(final_gas_balance)}	N/A	First v4 reconstruction for JIM001.
Cylinder Financial Balance	N/A	R\${fmtClean(final_cyl_balance)}	N/A	First v4 reconstruction for JIM001.
Cylinder Custody Exposure	N/A	R\${fmtClean(totalCylinderCustodyExposure)}	N/A	First v4 reconstruction for JIM001.
Total Reconciled Balance	N/A	R\${fmtClean(final_combined_balance)}	N/A	First v4 reconstruction for JIM001.

LPG Prior-Month Payment Intent Matching Register
